Hazardous Decomposition or Byproducts

In use, dust and decomposing odors may be generated. In most cases, the material removed from the workplace will be significantly greater then the grinding wheel components. Coolants may produce other decomposition products. For products containing phenol and formaldehyde resin, thermal decomposition may produce trace amounts of phenol and formaldehyde. For products containing inorganic fluorides, thermal decomposition may produce trace amounts of fluorides.

| Hazardous                       | May Occur |   | Conditions to avoid: |  |  |  |  |  |
|---------------------------------|-----------|---|----------------------|--|--|--|--|--|
| Polymerization                  | Stable    | Χ | N/A                  |  |  |  |  |  |
| Section VI - Health Hazard Data |           |   |                      |  |  |  |  |  |

Inhalation? Skin? Ingestion? Route(s) of Entry: During normal use Affects breathing capacity Irritation No affects Health Hazards (Acute and Chronic)

ACUTE: Dust may be slightly irritating to eyes and respiratory tract at high concentrations. CHRONIC: May affect breathing capacity. For products containing phenol/formaldehyde resin dust generated from intended use may contain trace amounts of phenol and formaldehyde which may cause skin sensitization and airway obstruction. For products containing inorganic fluorides, excessive exposure to inorganic fluorides has been shown to increase bone density. Signs and Symptoms of Exposure:

**INHALATION:** May cause airway obstruction. **EYES:** May irritate eyes. **SKIN:** Some may experience skin irritation. **INGESTION:** No known adverse affects, but ingestion not recommended.

Medical Conditions Generally Aggravated by Exposure:

None

**Emergency and First Aid Procedures** 

**INHALATION:** Remove to fresh air. If breathing stops, get medical attention immediately and give artificial respiration. **EYES:** Wash with large amounts of water and obtain medical attention if needed. SKIN: Wash affected areas with soap and water and obtain medical attention if needed. **INGESTION**: Call poison control center, hospital emergency room, or physician immediately.

## Section VII - Precautions for Safe Handling and Use

Steps to Be Taken in Case Material is Released if Spilled

Follow normal clean up procedures.

Waste Disposal Method

Use standard landfill methods consistent with applicable Federal, State, Provincial, and local laws. Products with listed fluorides may have slightly soluble fluoride swarf.

Precautions to Be Taken in Handling and Storing

Always handle and store in a careful manner.

Other Precautions

ALWAYS visually inspect wheels before mounting, check machine speed against the established maximum safe operating speed marked on the wheel, check mounting flanges for equal and correct diameter, use mounting blotters, be sure work rest is properly adjusted, use a safety guard covering at least one-half of the grinding wheel, allow newly mounted wheels to run at operating speed with guard in place for at least one minute before grinding, and turn off coolant before stopping wheel to avoid an out-of-balance wheel.

## Section VIII - Control Measures Respiratory Protection (Specify Type) Respirators are required when airborne contaminant levels exceed the TLV's. Ventilation Special It is recommended when general ventilation is not None keeping the airborne concentration below the TLV. Mechanical Other None None Protective Gloves Eve Protection Always wear safety glasses None

Other Protective Clothing or Equipment:

Use of this product may create elevated sound levels. Hearing protection should be worn where required (see OSHA 29 CFR 1910.134 and other applicable regulations).

Work/Hygienic Practices

None

The information and recommendations set forth are made in good faith and believed to be accurate as of the date of preparation. MILWAUKEE ELECTRIC TOOL CORPORATION makes no warranty, expressed or implied, regarding the accuracy of this data or the results to be obtained from the use thereof.
