Innovation and Science

NuvoH2O is the next generation of innovative, environmentally friendly water protection that uses all-natural citrus to provide a salt-free softening solution for hard water. NuvoH2O prevents, protects and saves appliances, plumbing and fixtures from the costly and unsightly effects of scale buildup.

Developed from over 25 years of commercial experience, nuvoH2O systems use the basic scientific principle of chelation to bind the minerals making them soluble so

they wash away freely from your body, hair, dishes, fixtures, appliances and plumbing.

NuvoH2O is compact and easy to install. It requires no electricity, no drain, no brine tank, and no calibration. NuvoH2O's FDA approved, food-grade ingredients are safe and healthy for your plants, your pets and you. Enjoy all the benefits of softened water in your home without the cost, poor taste, hassle and environmental problems of salt-based water softener systems.

Family-Friendly

With a low initial cost, minimum maintenance and a lifetime product warranty, your family can enjoy long-term, healthy, salt-free softened water without the prohibitive expenses of traditional systems. According to independent studies, an average family of four with a water hardness of 10 grains per gallon can save over \$2,000 per year with the use of a quality water softener. These savings come from increased efficiencies, effectiveness and longer life of pipes, fixtures, appliances, cleaning detergents, and clothing.

Manor For homes over 2,000 sq feet, homes with much higher than normal water use or homes with extremely hard water.

Home For homes between 1,000 and 2,000 sq feet and normal water use.

Studio For condos, townhouses and apartments that are less than 1,000 sq feet.

(All systems require cartridge change approximately every six months.)

Manor System:

- Size: 8" x 26"
- Weight: 14 pounds
- Water flow: 15-18 gpm with 1.5" ports (*no change to existing flow*)
- Capacity: about 50,000 gallons or 6 months

Home System:

- Size: 5" x 24"
- Weight: 7 pounds
- Water flow: 12-15 gpm with 1" ports (*no change to existing flow*)
- Capacity: about 35,000 gallons or 6 months

Studio System:

- Size: 5" x 14"
- Weight: 4.5 pounds
- Water flow: 12-15 gpm with 3/4" ports (*no change to existing flow*)
- Capacity: about 20,000 gallons or 6 months
