

# Rain Bird® Anti-Siphon Valves

Durable, reliable, built to last.

## Easy to Install and Service

Experience 60 percent easier system tuning with power-steering flow control, a patented pressure-assisted system.

## Superior Durability

In extreme temperature testing, the DVF unit in Rain Bird® Anti-Siphon Valves showed no leakage or delayed opening and closing.

## Longer Life

In lifetime testing, the DVF unit in Rain Bird® Anti-Siphon Valves outlasts the competition by as many as six years.

## Exclusive Features

Reverse Flow Design prevents flooding, while Dual Filtration System at Solenoid minimizes debris clogging.

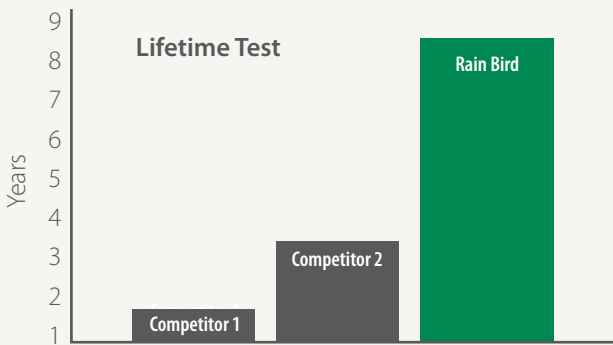

**RAIN**  **BIRD**®

# An open and shut case of superior performance.

Day after day, season after season, Rain Bird valves open and close on cue every time. If unmatched reliability weren't enough, Rain Bird valves also install faster, deliver more features and cost less than competitive valves. It's no wonder they've been contractors' No. 1 preference for decades.

## Comparison Testing

We don't just say our valves last longer than competitive valves, we prove it. DV and DVF valves were shown to perform for a minimum eight and a half years without failure, outlasting competitors by up to six years.\* It's just one more reason you can rest assured with Rain Bird.

\*Valves were operated under normal conditions (110° F, 20 GPM at 150 PSI) to simulate 7 years of operation. Operation was not to exceed 30 minutes per cycle, 3 cycles per day, 365 days per year for 7 years, equating to 7,665 cycles.

## See how Rain Bird valves stack up with the competition.

	Rain Bird® ASVF Valve	Competitive Valve
<b>Backflow Protection:</b> Valve stops the backflow of irrigation water into the household's potable water supply.	✓	✓
<b>Reverse Flow Design:</b> Valve remains closed in the event of a diaphragm failure, preventing flooding.	✓	
<b>Dual Filtration System at Solenoid and Diaphragm:</b> Minimize clogging from debris intrusion and prevent failure to close.	✓	
<b>Heavy-Duty Solenoid:</b> Prevent damage from drops and electrical surges.	✓	
<b>Elliptical Filter:</b> Valve 60% more efficient at resisting obstruction by debris.	✓	
<b>Flow Control:</b> Get the most effective flush-out system on the market.	✓	✓
<b>List Price</b>	<b>\$28.00</b>	\$30.00
<b>Trade Warranty (years)</b>	<b>5</b>	5 (Solenoid only)

## Anatomy of the Industry's Toughest Valve

**Flow Control** is ideal for applications with varying pressure and provides the most effective flush-out on the market. *Only available on DVF Valve.*

**Diaphragm** lifts higher than other valves to let the toughest debris pass through.

**Elliptical Filter** is 60% more efficient at preventing obstruction from debris.

**Heavy-Duty Solenoid** resists breakage from drops and stands up to electrical surges with 24 VAC protection.

**Backflow Prevention** stops the backflow of irrigation water into the household's potable water supply.

**UV-Resistant Material** withstands a minimum of ten years worth of daily sunshine during testing.
