

IBOC® 300-9V BATTERY POWERED

1 STATION OUTDOOR

IBOC300-9V

BAT9VDC

A highly reliable, battery-operated, valve-mounted controller designed to provide automatic valve operation in areas where a hardwire connection is impractical or for temporary operation of a valve when field wiring is cut or broken. Irritrol. **Get more done.**

SO EASY TO USE,
YOUR ONLY CALLBACK WILL BE
A THANK YOU.

KEY FEATURES & BENEFITS

REMOTELY PROGRAMMABLE WITH THE RCP8 PLUS (SOLD SEPARATELY)
Allows convenient reprogramming

BATTERY-POWERED UNIT FEATURES LOW POWER CONSUMPTION
For application without AC power

USES STANDARD 9V DC BATTERY
Readily available (not included)

ADDED FEATURES

- Three start times per program
- Seven-day calendar or interval programming
- True odd/even programming with automatic 31st day skip
- Programmable "Rain Off" up to seven days
- Programmable address allows easy programming of multiple units in a single valve box
- Modular design allows for easy field programming
- Water-resistant construction provides reliable operation
- Retains program up to two minutes during battery replacement
- International icons with English captions
- Default program option allows for quick setup – simply plug in battery and setup is complete
- LED lights verify program input and operation
- Fits all Irritrol irrigation valves with internal manual bleed – requires VA12 adapter (included)
- Low-profile design fits in valve boxes
- Infrared programming overrides any manual program settings
- One-year battery life with typical operation
- Two-year controller warranty
