ECO-0550 Geothermal Control

Your Geothermal Installation, Made Easy

Introducing the simplest, most intuitive control available to the geothermal industry: the ECO-0550, now with the ThermoLinX™ Hydronic Network, allowing you to control your geothermal system from the palm of your hand.

The ECO-0550 covers a multitude of geothermal applications, and can accommodate for heat pumps with a backup boiler, reversing valve and a system pump for complete system coverage with the ability to control single or dual tank systems.

Features

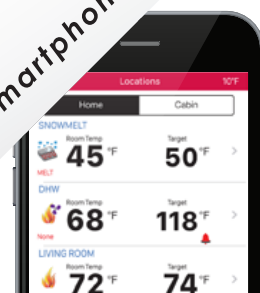

- Remote access via Apple® or Android™ Smartphone or tablet devices
- Control up to 3 heat pump stages
- Backup boiler control
- Single or dual tank modes
- Runs reversing valve or 3 way mixing valves
- Lockout heat pumps and run backup boiler only
- Rotates heat pumps on time or cycles
- Alarm notifications on tank temperatures
