48-22-8429	PACKOUT™ XL Tool Box	Page 15
48-22-8428	PACKOUT™ Rolling Job Box	Page 15

As an aid to removing a damaged Latch Assembly (9), use two large flat blade screwdrivers. Push blades between parts as shown. Twist both screwdrivers at same time to force the blades into opening and work the latch assembly over the two locking tabs.

To install a new latch assembly, position entire latch assembly over locking tabs with the two top lugs partially inserted in 'catch cavity' of main housing. Engage latch bar onto lid and gently press latch lever to slide assembly over two locking tabs and into place.

This removal and installation process will be the same where other service latches are offered in this system.
