- ASME A112.18.1 / CSA B125.1
-  Indicates compliance to ICC/ANSI A117.1
- Control/Sensor Box Option 7, Pressure Balancing Valve, complies with ASSE 1016
- Control/Sensor Box Option 8, Thermostatic Mixing Valve, CSA certified to ASSE 1069, 1070 and CSA B.125.3
- Handshower back flow protection provided by two integral certified check valves in series, which operate independently, ASME A112.18.3
- Patented
- PAUSE WARNING for #5 Handshower. Plumbing Codes require that showerheads and handshowers provide a small but continuous flow of water (trickle) when in "PAUSE" mode. Because of this continuous flow, in certain circumstances pressure variations in the water line and/or changes in the position of the shower temperature control handle while in "PAUSE" mode could result in dramatic changes to the temperature of the water when the shower head or hand shower is returned to the "ON" position. ALWAYS point the shower head away from yourself when returning to the "ON" position and feel the water with your hand before resuming your shower to ensure the water flow is not too hot or too cold. DO NOT allow children or others who might not understand this warning to use the "PAUSE" function.
- Control / Sensor Box Option 8, Thermostatic Mixing Valve, CSA certified and meets ASSE 1069, 1070.
